Thank you for your posting on the Phoenix Journals and Hatonn.

It is not so much that I don't believe that "channeling" is real, but more, what scientific methods can be applied to study the phenomena? I was talking with a person the other day who told me that there have been some solid-based scientific research done regarding psychic phenomenon.

Does anyone have any information relating scientific research being conducted to validate psychic phenomenon?

Mike

STRANGE LIGHT IN SKY DRAWS ATTENTION

by David Baker, THE GULF BREEZE SENTINEL, March 3, 1991.

On February 23, 1991 two Pensacola men were sighting on the three mile bridge. AT approximately 7:50 p.m. the fishermen's attention was drawn to a bright red light which suddenly appeared over Gulf Breeze.

The two men said the light would dim then come back bright red, stay that way for a while and then dim again, all the while moving slowly in their direction. They detected no sound from the object.

Before the object disappeared it blinked to green momentarily, changed to a brilliant white and slowly faded away. The sighting lasted about four minutes and there were nine additional witnesses.

Mike; from I have heard, there has been a lot of articles been written on this object because it is different from anything that they have detected. There are other Ufologist that are also interested and are keeping tabs on SS433. I wish I could tell you more but can't at this time. But from passed history, we are sometimes not told the whole truth about certain things. And this we are told for are on good. I think that SS433 maybe one of those half truths. Maybe some of the readers of this echo might have some information that they would like to share on this subject.

If you get the feeling that I'm side stepping this, I am because I don't want anybody to get into trouble. 73's ---Jim---

How about that maybe a ufo used the fireball as cover, so as to be hidden from radar until it could drop below radar coverage. Speculation, of course.

I'm no kind of expert on flares, but generally they really mess up radio communications and a strong flare can cause an aurora in latitudes much closer to the equator than ordinarily.

UTC (GMT, Zulu) is five hours ahead of EST.

Some kids let loose balloons with a light attached across a softball field. It was a very low-level, short-lived event, complete with a police apprehension of the kids.

While I agree that at least some of the red light sightings are probably hoaxes, I think we'd really need to examine all the red light events in order to draw any valid conclusions or opinions. And it's very difficult to get all those reports together.

What's the number? I have a friend who would be very interested in this material. Personally the catalog would be something to see. Concentration camps in the US? Sure they are going to be over filled with criminals, because we already have the highest level of imprisonment, even more than the ruskies. Meanwhile what does all this Othave to do with Paranormal or UFO's, there must be some titles in there about aliens taking over or something? Any clues as to the base origin of these articles?

I read your continuing debate with boredom at many points. The reason is not what you have stated or in some cases what others propose, but because of the nit picking out of your statements, mis-quoting, and goal-less attacks on motives or people. (that may have been unclear, I meant picking parts out of your statements without concern for the whole of the material, then arguing one word instead of a concept)

My answer is in this case: "You can lead a horse to water, but you can't teach it to do the back stroke!"

Keep trying Rick!

Subject: New Echo  
Date: 16 Mar 91 01:56:00 GMT

This is to announce that ParaNet Information Service has started a new echo to be carried on the FidoNet backbone. It is a general UFO echo which will be available to anyone wishing to carry it without having to join the ParaNet Network. Its purpose is to assure that a balanced conference is provided for the uninitiated enthusiast who wishes to learn more about the phenomenon. Any FidoNet sysop or alternate network sysop who wishes to carry it is encouraged to netmail Michael Corbin @ 1:104/422 or Paul Faeder @ 1:268/102.

From: anubis.network.com!logajan  
Subject: Unusual Aircraft Illuminations  
Date: 16 Mar 91 20:17:35 GMT

From: logajan@anubis.network.com (John Logajan)

One of my associates reports that he was out for an evening walk with his dog here in the Minneapolis area last week when a high altitude aircraft shined an incredibly bright light directly down on him. The aircraft was almost directly overhead when the beam passed over him. This rules out landing lights as they point forward and down, and not just down. He said the beam passed over him very quickly, probably at the ground speed equivalent of the aircraft's velocity.

By high altitude he probably meant no longer able to distinguish aircraft shape (at night). And he described the brightness as 'daylight.' The aircraft had normal lights otherwise.

To All:

In order to improve the quality of the network, we have incorporated a questionnaire form in this message for our readership. We would appreciate you taking a moment of your time to reply to it so that we may get an idea of how you view our service.

Responses are welcome in this conference, or by netmail via Fidonet or Internet at the following addresses:

Fidonet: Michael Corbin @ 1:104/422  
Internet: mcorbin@scicom.alphacdc.com

We hope that you will provide us with a reply as this is your network, and our efforts can be maximized with your feedback and cooperation.

Thank you.

Michael Corbin  
Director

Dear Jim --

Perhaps you've forgotten (or somehow overlooked) that I was the fellow  
who spoke up \_against\_ removing Bill Cooper's files from our download  
directories, and was the only sysop in these parts to do so. Maybe you  
and I can form a Wild Bill Protection society, against the closed-minded  
Paranet hordes. ;-)

I've always been strongly in favour of open-mindedness -- as long as  
your mind isn't so open that things flutter in and out.

Best Regards,  
Rick Moen, Secretary  
Bay Area Skeptics  
Member, Electronic Communications Subcommittee, CSICOP

From: Michael.Corbin@f4.n104.z1.FIDONET.ORG (Michael Corbin)  
Subject: Fireball clippings  
Date: 17 Mar 91 22:42:00 GMT

Copyright 1991. The Associated Press. All Rights Reserved.

PHILADELPHIA (AP) -- A brilliant fireball that looked like "a boomerang on its side" with a greenish-red tail streaked on Wednesday across the sky over much of the Northeast, authorities said.

The fireball flashed over southeastern Pennsylvania shortly after 3 a.m., according to Jim Krimm, an air traffic controller at Philadelphia International Airport. A pilot radioed that it "appeared to be the mother of all meteors," Krimm said. "He said he had never seen anything in all his time flying." Observers in Atlantic Highlands, N.J., and Ithaca, N.Y., and from southwestern New Hampshire to Bangor, Maine, reported seeing the fireball. Federal Aviation Administration representatives said pilots reported the fireball to several airports in northern New Jersey. "This was big," said New York state trooper Richard Haas. "I've seen shooting stars before and this was nothing like that." FAA spokeswoman Diane Spitalieri said pilots who called airports in Teeterboro, N.J., and Garden City, N.J., said the bright light was moving back and forth over New York City. Mark Barton, a police officer near Boston, said it looked like a "a boomerang on its side. A cluster of lights with a big red firetail behind it." Stan Gordon of the Pittsburgh-based Pennsylvania Association for the Study of the Unexplained, a clearinghouse for UFO reports, said he received reports describing a fireball that lasted five to six seconds, with a green tail mixed with some red color.

-----  
From Associated Press, later. Same restrictions apply.

AP 03/06 19:48 EST V0679

Copyright 1991. The Associated Press. All Rights Reserved.

PHILADELPHIA (AP) -- People from Maine to West Virginia reported a brilliant fireball in the sky early Wednesday, offering descriptions ranging from "the size of a Volkswagen" to the shape of a "boomerang on its side." "This was big," said New York state trooper Richard Haas. "I've seen shooting stars before and this was nothing like that." People in West Virginia, Virginia, Pennsylvania, New Jersey, New York, Connecticut, Massachusetts, New Hampshire and Maine reported seeing the bright light, moving from west to east, about 3 a.m. Philadelphia air traffic controller Jim Krimm said he took three phone calls reporting it. One pilot radioed that it "appeared to be the mother of all meteors," Krimm said. Many witnesses said the object appeared to have a green-and-red tail and lit up the sky for about five seconds before

it disappeared over the horizon. Haas said he was driving in Danby, N.Y., when he and his partner saw the bright light in the western sky. "It appeared to be real low," Haas said. "We opened our windows to listen for a crash, but we didn't hear anything." In Atlantic Highlands, N.J., Danny Fletcher, 23, said he had just returned home from work when he saw the speeding light close to the horizon. "At first, I thought it was a Scud missile," he said. Mark Barton, a police officer near Boston, said it looked like "a boomerang on its side. A cluster of lights with a big red fire tail behind it." "It was green in color. I'd say it was about the size of a Volkswagen," said police Sgt. John Huyett in Martinsburg, W.Va. What people saw most likely was a low-flying meteor that burned brightly from the friction of entering the Earth's atmosphere, said Walter Webb, manager of planetarium observations at the Charles Hayden Planetarium in Boston. "It's not unusual for fireballs to be seen over an area of several hundred miles," Webb said. Derrick Pitts, an astronomer at the Fells Planetarium of the Franklin Institute in Philadelphia, said the object likely eventually broke up. James Cornell of the Smithsonian Astrophysical Observatory in Cambridge, Mass., said the object either disintegrated in the atmosphere or fell into the Atlantic Ocean, based on its west-to-east trajectory. "About 95 percent of these meteors disintegrate in the atmosphere, usually about 30 or 40 miles above the earth's surface," Cornell said. Cornell and Webb said they had been in contact with federal officials, who were not tracking any satellites that might have fallen to Earth at the time.

From Internet-CIS E-mail, forwarded by Jim Shaffer:  
Subj: Long Island UFO reported

Clark Matthews announced a UFO sighting on Paranet which seems like it's probably connected to the fireball that we were discussing in the Issuesforum. (Either it's connected, or it's a really unfortunate coincidence -- unfortunate because the debunkers will point to the fireball and ignore the rest of the reports.)

Here's the article -- it looks like this case is going to be a big one, no matter what the media do with it!

From CIS Issues, section 10:

#: 103325 S10/Paranormal Issues  
11-Mar-91 00:11:40  
Sb: #102464-Eastern US Fireball  
Fm: James T. Sullivan 76210,1244  
To: Michael Houdeshell 70003,4667

Thanks for the return on the UFO/Fireball. Other oddball things have been coming to my attention since the night of the sightings. It seems two of my employees are convinced what they saw was a real entity, under some apparent intentional control, moving without consideration of basic aerodynamic properties, and executing these moves quite rapidly. One of the oddball things I have noticed, as if this story wasn't enough, was the manner they spoke about the sighting: they both get quite emotional (and they're not the fantasy-prone type) when I asked them what they were doing immediately prior to the sighting. They appear to have had some sort of memory lapse. And they also appear to be unduly upset by this lapse. Jim Sullivan

To: James T. Sullivan 76210,1244 (X)

What really gets me is that an FAA spokeswoman told the AP that two pilots had (separately) seen and reported the fireball moving back and forth over The Big Apple. Isn't that a first?

There are 2 Replies.

Read action !pare

#: 102384 S10/Paranormal Issues

07-Mar-91 03:00:18

Sb: #102263-#Eastern US Fireball

Fm: James T. Sullivan 76210,1244

To: Michael Houdeshell 70003,4667 (X)

Two police officers and several of my friends saw the "fireball". I live Burlington, MA, where a lot of the action took place. Two of my employees told me they saw it hover, under apparent control, and display some lighting effects (blue beams). Another weird coincidence: I have a friend in the movie biz who sculpted Alien's for Communion. I have one sitting on my desk as a big paperweight. Several people I frequently do business with can't tolerate the sculpture in the room with them and I'm always forced to remove it. They have no interest in paranormal events (almost overly derisive of the subject) - they share that aversion. They are from this area.

The day before the "fireball" appeared here, one of these skeptics stormed into my office to tell me his 9 year old daughter woke him, complaining of little alien creatures in her bedroom. He scoffed, sent her to bed, behaving like a good skeptic (he didn't even give her a plausible "bad dream" explanation).

Another employee told me today that it woke her right out of bed. I asked her how - sound, light, smoke? She has no recall. Radio stations have been buzzing with call-in's all day. Keep in mind that this is not Mayberry RFD, but a large high-tech sector, just ten minutes from Boston.
